

The JanOPS® Creed: Dependable

Being dependable means you never let your team down. Your team can count on you to always fulfill your responsibilities as a *JanOPS* specialist.

A *JanOPS* specialist does six things to demonstrate his dependability:

1. Always calls if she is sick or can't make it to work.
2. Always arrives on time.
3. Follows the *JanOPS* standard workflow.
4. Completes *JanOPS* processes she was trained to do.
5. Completes required documentation.
6. Looks out for other *JanOPS* specialists and their responsibilities.

As a *JanOPS* specialist, being dependable is one of the most important qualities for promotion, and for success in whatever career you choose. Dependability is also what makes the *JanOPS* operating system successful on a daily basis.

Did you know?

Dependability is one of the most important qualities an employer looks for when hiring a new employee.
